

#### — THE PROBLEM

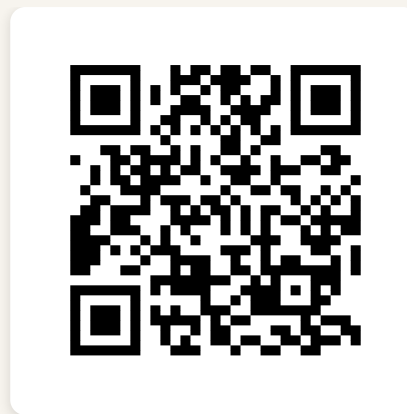

## Decades of research sit unread on shelves.

- Theses and field reports exist only on paper, many typed or handwritten.
- Students cannot search what the university already knows.
- Librarians answer the same questions again and again.

#### With Oxonia Library

Oxonia Library digitises your collections and answers questions in plain language from them, citing the document and the page.

- AI-enabled. A person approves every official record.

OXONIA

## Library

Your university's research, answering questions.

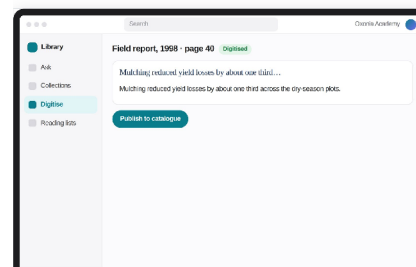

**oxonia.ai**

## — HOW IT WORKS

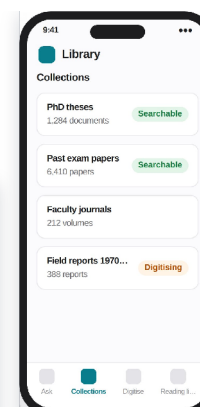

A cited answer from your own theses

- 1 Bring in your collections**  
Theses, past papers, journals and reports, organised in collections.
- 2 Digitise old theses**  
Typed and handwritten pages become searchable text.
- 3 A librarian checks and publishes**  
Pages that need checking are flagged; nothing is published without a librarian.
- 4 Ask in plain language**  
Every answer cites the document and page it came from.

An old field report, digitised

Collections, searchable

## — ALSO INCLUDED

### Reading lists

Lecturers build reading lists from the collections.

### Saved searches

Researchers follow topics and see new material.

## — WHO USES IT

### Researchers

Cited answers from the university's own work.

### Students

Past papers and theses, searchable.

### Librarians

Checks digitised pages and publishes them.

### Lecturers

Reading lists from the collections.

## — WHAT IT MEANS FOR YOUR UNIVERSITY

### Saves time

- Answers with page citations instead of hours of searching.
- Librarians check only the pages that are flagged.

## — QUESTIONS UNIVERSITIES ASK

### Will the answers be made up?

Every answer cites the document and page it came from, so it can be checked.

### Can it read handwriting?

Yes, typed and handwritten pages. Pages with low confidence are flagged for a librarian to check.

### Who decides what is published?

A librarian. A clean document is marked ready, but only published by a person.

### Who owns our data, and is it safe?

Your records belong to your university. Each university's data is kept separate and every access is written to your audit log. We don't use your content to train AI models, and our AI providers work under business terms that don't allow training on it. Oxonia is built for Nigeria's Data Protection Act and the UK GDPR, and you can export everything.

### How do we get started, and is there training?

People are invited once with their Oxonia Academy ID. Your records come in by import, staff and students get short lessons with certificates, even on WhatsApp, and our team plans the go-live with you.

## — WORKS WITH THE REST OF OXONIA

One Oxonia Academy ID signs everyone in to every product your university gives them, and a launcher shows each person the products they may open.

### Oxonia Research

The research office in one place.

### Oxonia Scribe

Every lecture, captured and turned into study packs.

### Oxonia Tutor

An Oxford-style tutorial for every student.

Screens show illustrative data.
