

— THE PROBLEM

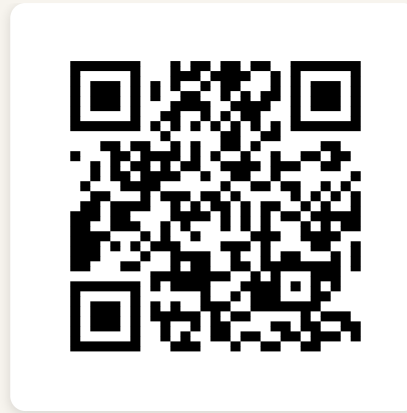

Six hundred scripts, one deadline.

- Marking handwritten booklets takes weeks of evenings.
- Marks are hard to explain to moderators, students and appeal panels.
- Results packs for Senate are compiled by hand.

With Oxonia Mark

Oxonia Mark reads handwritten or online scripts, marks them against your rubric with evidence for every mark, and sends only the hard scripts to your examiners.

- AI-enabled. A person approves every official record.

OXONIA
Mark

Exam scripts marked, every mark explained.

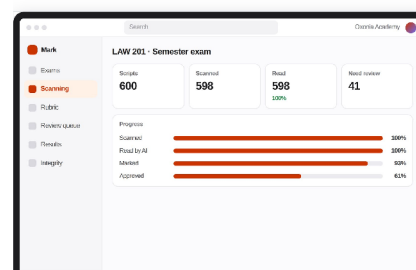

oxonia.ai

— HOW IT WORKS

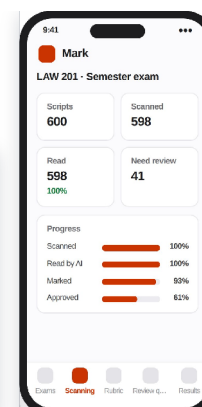

Every mark quotes its evidence

- 1 **Scan with a phone**
Booklets photographed even with no signal, uploaded when it returns, and matched to candidates.
- 2 **Approve the rubric**
Calibrated on sample scripts and approved before marking starts.
- 3 **Evidence for every mark**
Each mark quotes the words that earned it, with a confidence score.
- 4 **Only the hard scripts reach people**
Uncertain, illegible, borderline and flagged scripts go to the review queue.
- 5 **Approve, moderate, release**
A named examiner approves every script; external examiners moderate a blind sample; the results pack goes to Senate.

Scanning progress for an exam

Scanning on a phone

— ALSO INCLUDED

Online exams too

Run exams online as well as on paper.

Students see why

The marked script and feedback for every question.

Appeals tracked

Re-mark requests and appeals followed to a decision.

— WHO USES IT

Lecturers

Reviews only the scripts that need judgement.

Exams office

Scanning, candidates, deadlines and the Senate pack.

External examiners

Moderates a blind sample and signs the report.

Students

Sees the marked script and why each mark was given.

— WHAT IT MEANS FOR YOUR UNIVERSITY

Saves time

- Only uncertain and borderline scripts reach your examiners.
- The broadsheet and the Senate results pack are prepared from the marks.

Saves money

- Booklets scanned with the phones and copiers you already have.

— QUESTIONS UNIVERSITIES ASK

Can we scan where there is no signal?

Yes. Scanning works offline, and uploads resume automatically when the signal returns.

Who decides the final mark?

A person. Nothing is released until a named examiner approves the script, and external examiners moderate a blind sample.

Can students challenge a mark?

Yes. Re-mark requests and appeals are tracked to a decision.

Can we import candidate lists?

Yes. Candidate and seating lists are imported for each exam.

Who owns our data, and is it safe?

Your records belong to your university. Each university's data is kept separate and every access is written to your audit log. We don't use your content to train AI models, and our AI providers work under business terms that don't allow training on it. Oxonia is built for Nigeria's Data Protection Act and the UK GDPR, and you can export everything.

— WORKS WITH THE REST OF OXONIA

One Oxonia Academy ID signs everyone in to every product your university gives them, and a launcher shows each person the products they may open.

Oxonia Scribe

Every lecture, captured and turned into study packs.

Oxonia Tutor

An Oxford-style tutorial for every student.

Oxonia Senate

Council, Senate and committees, from agenda to signed minutes.

Oxonia Nexus

Records, accreditation and regulator returns.

Screens show illustrative data.
