

— THE PROBLEM

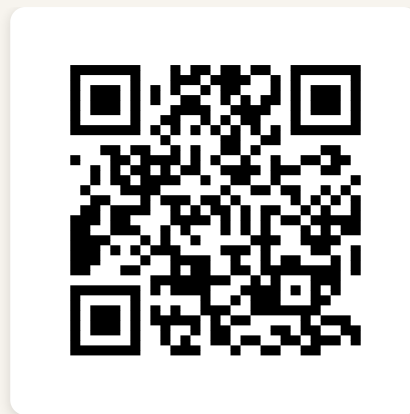

Funding calls missed, bids stuck in email.

- Researchers hear about funding calls too late.
- Bids and ethics applications circulate as email attachments.
- Outputs and income are counted by hand for every report.

With Oxonia Research

Oxonia Research matches funding calls to each researcher, routes bids and ethics applications for approval, keeps PhD supervision on track and reports outputs and income.

- AI-enabled. A person approves every official record.

— HOW IT WORKS

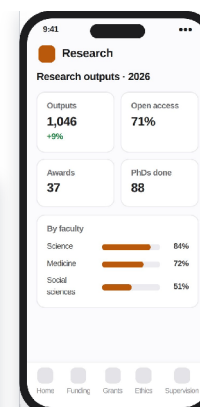

Funding calls matched, with the reason

- 1 Calls matched to you**
New funding calls matched to each researcher, with the reason why.
- 2 Build the bid**
AI-enabled drafts of sections, kept apart until a person accepts them; budget lines; internal sign-off.
- 3 Research ethics**
Applications sent to reviewers, with decisions and conditions tracked.
- 4 Projects and PhDs**
Awards become projects with budget, milestones and status; PhD milestones from proposal to viva.
- 5 Outputs and impact**
Outputs synced both ways with ORCID; research income reported by department.

A bid on its way to sign-off

PhD students on track

— WHO USES IT

Researchers

Calls matched, bids built, outputs on ORCID.

PhD students and supervisors

Meetings, progress reviews and milestones.

Research office

Approvals, ethics and reports.

Deputy Vice-Chancellors

Research income by department.

— WHAT IT MEANS FOR YOUR UNIVERSITY

Saves time

- Calls are matched for you, and approvals are routed, not emailed.
- Reports come from live records, not from spreadsheets.

Helps generate income

- More bids, from calls matched to your researchers.
- Research income visible by department.

— QUESTIONS UNIVERSITIES ASK

Does it write our bids?

It drafts sections to help. Drafts are kept apart from the text until a person accepts them.

Does it work with ORCID?

Yes. Works are imported from ORCID, and outputs are added or updated there.

Who approves a bid?

Your internal approval chain, such as the head of department, the research office and finance.

Who owns our data, and is it safe?

Your records belong to your university. Each university's data is kept separate and every access is written to your audit log. We don't use your content to train AI models, and our AI providers work under business terms that don't allow training on it. Oxonia is built for Nigeria's Data Protection Act and the UK GDPR, and you can export everything.

How do we get started, and is there training?

People are invited once with their Oxonia Academy ID. Your records come in by import, staff and students get short lessons with certificates, even on WhatsApp, and our team plans the go-live with you.

— WORKS WITH THE REST OF OXONIA

One Oxonia Academy ID signs everyone in to every product your university gives them, and a launcher shows each person the products they may open.

Oxonia Library
Your university's research, answering questions.

Oxonia Nexus
Records, accreditation and regulator returns.

Oxonia Senate
Council, Senate and committees, from agenda to signed minutes.

Screens show illustrative data.
