

— THE PROBLEM

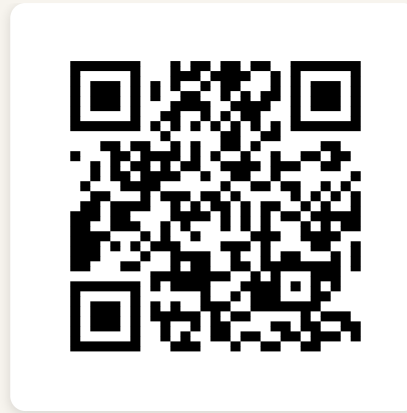

One tutor cannot sit with three hundred students.

- Large classes leave little time to talk through each student's own work.
- Students rarely practise arguing a point out loud before a viva or moot.
- Feedback arrives late and is hard to act on.

With Oxonia Tutor

Oxonia Tutor gives every student a real tutorial on their own work, by voice or in writing, and a clear report afterwards.

- AI-enabled. A person approves every official record.

Oxonia Teach · For lecturers

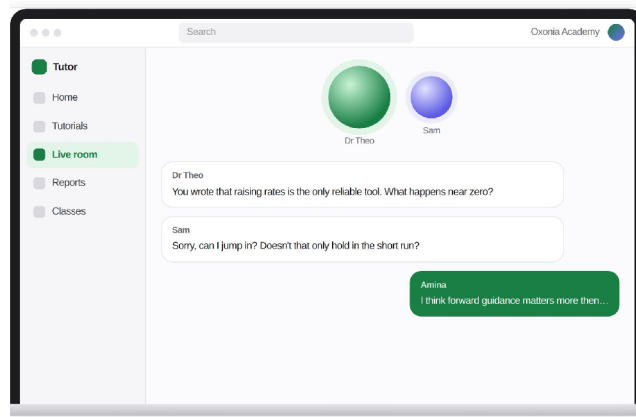

OXONIA
Tutor

An Oxford-style tutorial for every student.

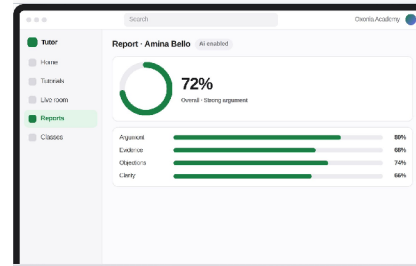

oxonia.ai

— HOW IT WORKS

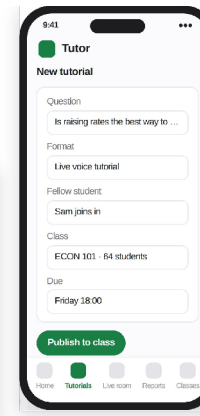

A live tutorial, with Sam joining in

- 1 Set a tutorial in a minute**
Type the question; the builder suggests the format, readings and rubric for you to edit.
- 2 Choose the format**
Tutorial, debate or moot; written, a spoken viva or a live conversation.
- 3 A real conversation**
The tutor listens, questions the student's own work and can be interrupted. Sam, a fellow student, joins in with other views.
- 4 Readings and sketchpad**
The tutor quotes the PDF readings with the page, and reacts to what the student draws.
- 5 A detailed report**
Scores against the rubric, strengths and the one thing to work on.

The report after the tutorial

A tutorial, set in a minute

— ALSO INCLUDED

Exam conditions

No hints, and a time limit for each answer.

Group tutorials

Several students in one tutorial, each judged on their own answers.

Progress over the term

Each student's results across every tutorial.

— WHO USES IT

Lecturers

Sets tutorials and reads the reports.

Students

Practises arguing their own work, at any time.

Deans and heads of department

Sees progress across the term.

— WHAT IT MEANS FOR YOUR UNIVERSITY

Saves time

- One tutorial setting serves the whole class.
- Reports are written for you, scored against your rubric.

Saves money

- Every student gets tutorial practice without adding teaching hours.

— QUESTIONS UNIVERSITIES ASK

What if a student's connection is weak?

Tutorials can be written as well as spoken, so students on a weak connection can type their answers.

Can we trust the reports?

Reports score against your rubric. Class figures appear only once enough students have finished, so no one is singled out.

Which languages?

Tutorials can run in the student's language, including Arabic, French and Portuguese.

Who owns our data, and is it safe?

Your records belong to your university. Each university's data is kept separate and every access is written to your audit log. We don't use your content to train AI models, and our AI providers work under business terms that don't allow training on it. Oxonia is built for Nigeria's Data Protection Act and the UK GDPR, and you can export everything.

How do we get started, and is there training?

People are invited once with their Oxonia Academy ID. Your records come in by import, staff and students get short lessons with certificates, even on WhatsApp, and our team plans the go-live with you.

— WORKS WITH THE REST OF OXONIA

One Oxonia Academy ID signs everyone in to every product your university gives them, and a launcher shows each person the products they may open.

Oxonia Scribe

Every lecture, captured and turned into study packs.

Oxonia Mark

Exam scripts marked, every mark explained.

Oxonia AI Hub

AI literacy and the rules, for every student.

Screens show illustrative data.
